A few disclaimers...

2

Should we use social media to find evidence?

Sure!*

*with some caution

What are the benefits to finding evidence using social media?

Strength endurance: physics Do we do it or not?

strengthendurance_physics Do we do it or not?

What if you have pain in the muscle as it starts when lifting the weight? Is it because you're not strong enough? Or is it because you're not used to the weight? Or is it because you're not used to the weight? Or is it because you're not used to the weight? Or is it because you're not used to the weight?

Conclusions

Social media has its uses for identifying evidence but it is important to be critical

- Ask questions
- Use appraisal tools when possible
- Discuss with colleagues
